

Experiment 3: Morphological Analysis using NLTK

Program

```
from nltk.stem import WordNetLemmatizer

import nltk

nltk.download('wordnet')

lemmatizer = WordNetLemmatizer()

words = ["cars", "children", "running", "better"]

for word in words: print(word, "->", lemmatizer.lemmatize(word))
```

Output

```
1] 68 from nltk.stem import WordNetLemmatizer
import nltk

nltk.download('wordnet')

lemmatizer = WordNetLemmatizer()

words = ["cars", "children", "running", "better"]

for word in words:
    print(word, "->", lemmatizer.lemmatize(word))

... [nltk_data] Downloading package wordnet to /root/nltk_data...
cars -> car
children -> child
running -> running
better -> better
```
