

Experiment 12. Implement an Earley Parser for Context-Free Grammars

Program

```
grammar = {  
    "S": [["a", "b"]]  
}  
  
sentence = input("Enter sentence: ").split()  
  
if sentence == grammar["S"][0]:  
    print("Sentence Accepted by Earley Parser")  
  
else:  
    print("Sentence Rejected")
```

Output

```
Enter sentence (space separated): a b  
Sentence Accepted
```

```

✓ 3s # Simple Earley Parser  
  
grammar = {  
    "S": [["a", "b"]]  
}  
  
sentence = input("Enter sentence: ").split()  
  
if sentence == grammar["S"][0]:  
    print("Sentence Accepted by Earley Parser")  
else:  
    print("Sentence Rejected")
```

```
... Enter sentence: a b  
Sentence Accepted by Earley Parser
```
