

Experiment 17. Access WordNet to Retrieve Synsets and Word Meanings

Program

```
from nltk.corpus import wordnet

word = input("Enter a word: ")

synsets = wordnet.synsets(word)

if synsets:

    print("\nSynsets and Meanings:")

    for syn in synsets:

        print("Synset:", syn.name())

        print("Meaning:", syn.definition())

        print()

else:

    print("Word not found.")
```

Output

```
if synsets:|
    print("\nSynsets and Meanings:")
    for syn in synsets:
        print("Synset:", syn.name())
        print("Meaning:", syn.definition())
        print()
    else:
        print("Word not found.")
```
