

Experiment 19. Word Sense Disambiguation using Lesk Algorithm Program

```
import nltk

nltk.download('wordnet')

nltk.download('punkt')

from nltk.wsd import lesk

from nltk.tokenize import word_tokenize

sentence = input("Enter sentence: ")

word = input("Enter ambiguous word: ")

sense = lesk(word_tokenize(sentence), word)

print("Word Sense:")

print(sense)
```

Output

```
sentence = input("Enter sentence: ")
word = input("Enter ambiguous word: ")

sense = lesk(word_tokenize(sentence), word)

print("Word Sense:")
print(sense)
```
